

- Write the test cases of the login and cart process on ebay.com.
- Execute of functional and performance (load, stress, normal performance) tests according to test case
- Run service (integration) tests with postman. Share result with postman collection. (<https://www.postman.com/api-evangelist/workspace/ebay/request/35240-0ea504e6-941d-460b-a30f-000400cca6a7>).
- Our company has changed the concept. Now we will produce vending machines (from chocolate, water, soda, biscuits). The vending machine is ready and we will present it to the customer tomorrow. What kind of testing process would you follow?
